Bandung, Indonesia

I am an Informatics fresh graduate student at Telkom University. I intrested to web developing focused on building modern web applications using React JS on the frontend, as well as Laravel and Express JS for backend and API development. Experienced in working on real-world projects, highly adaptable to new technologies, and accustomed to working in a structured manner to deliver efficient, scalable, and user-friendly web applications.

Pengalaman Kerja

PT Kereta Api Indonesia (Persero) - **Bandung, Indonesia** Jun 2025 - Aug 2025

Intership - Software Engineer

Indonesia national railway company

- Developed a high-performance mobile application Application of Material Stock (AMS) using Flutter, focusing on scalability, clean architecture, and seamless user experience, resulting in improved operational efficiency and reduced manual tracking errors. (Jun 2025 – Aug 2025)
- Integrated SAP systems via RESTful APIs to enable real-time synchronization of material data, significantly improving data accuracy and reducing processing time for inventory updates.
- Built a web-based CMS using React.js and Laravel to manage AMS data, enabling administrators to efficiently monitor, update, and control material stock across multiple workflows.

PT CV. Tiga Permata Agri Lestari - **Bandung, Indonesia** Sep 2025 - Dec 2025

Freelance - Frontend Developer

Seed & Agricultural company

- Developed and implemented responsive, interactive, and user-friendly web interfaces using React.js, ensuring optimal performance across various devices.
- Integrated frontend applications with RESTful APIs and backend services to enable seamless data communication and dynamic content rendering.
- Implemented real-time chat functionality by integrating chatbot APIs, enhancing user engagement and support experience.

NoLimit Indonesia - **Bandung, Indonesia** Jul 2026 - Oct 2026

Internship - Frontend Developer

Online Media Technology Partner

- Maintaining and fixing bugs enhanced Engage Web App and Ops Panel Engage using Next.js, focusing on clean code, maintainability, and scalable UI architecture.
- Collaborated with the Backend team to integrate and consume RESTful APIs, ensuring seamless data flow between frontend and backend services.
- Translated UI/UX designs into responsive and reusable interfaces using modern frontend development practices.
